1 Introduction

CeTZ-Plot is a package for making plots in Typst using CeTZ.

2 Usage

This is the minimal starting point:

```
#import "@preview/cetz:0.2.2"  
#import "@preview/cetz-plot:0.1.0"  
#cetz.canvas({  
  import cetz.draw: *  
  import cetz-plot: *  
  ...  
})
```

Note that plot functions are imported inside the scope of the canvas block. All following example code is expected to be inside a canvas block, with the `cetz-plot` module imported into the namespace.
